This is our Wholesale Trade Catalog

—and is intended only for those engaged in the commercial growing or selling of bulbous stocks. We do not issue a retail catalog nor do a retail business. This issue (Sept. 1, 1930) cancels all prior quotations.

Why We Can Serve You to Better Advantage

QUALITY

Primarily we are bulb growers and it is our policy and desire to actually produce, to the greatest possible extent, all of the bulbs we sell. It is reasonable to believe that we can thus regulate a more consistent supply of uniform high quality bulbs than it is possible to obtain if we had to depend upon other suppliers.

PRICE

We handle more than ten percent of all the bulbous stocks that are either being grown or imported into this country and this large volume, coupled with the facts that most of the stocks are of our own growing, enables us to make our prices most reasonable.

SERVICE

By far the larger part of our business is made up of orders booked in advance of the shipping season and these early orders are usually shipped direct from our growing stations. We will have in stock at our New York warehouse, however, liberal supplies of all the stocks shown in this catalogue for prompt shipment as the various items are ready. We advise early orders as we are not in a position to replenish our supplies throughout the season.

CULTURAL SUGGESTIONS

We are anxious at all times to give our customers the benefit of such knowledge as we have acquired pertaining to the growing or care of any bulbous subjects. On the next page we give a few hints which will be of assistance to newcomers in the business and we want all of you to feel free to call upon us for special information at any time.

THANK YOU

We thank those of you who have favored us with orders in the past and we look forward to a continuance of your patronage. If you have not bought of us in the past we solicit your account with the assurance that we will do everything in our power to serve you to your entire satisfaction.

1930 Bulb Crop

WITH the better than average growing conditions that have prevailed in most of the bulb sections this season good crops have been produced and this means that not only will greater quantities be available; but the quality will also show considerable improvement over last year's delivery. In Holland particularly the crop is very much better than last season and as a result many items are lower in price.

Hyacinths particularly have shown a large drop and Tulips have also declined over there. Unfortunately the increased tariff on the latter (Tulip bulbs have been raised from \$2.00 to \$6.00 per 1,000) prevent American users from getting the full benefit of the lower Dutch prices.

In this country ideal conditions have prevailed for the production of Narcissus bulbs in both the Tender and Hardy varieties and we also see price concessions on these items.

As we go to press, no very definite information is available from Japan regarding the Lily situation. These Japs are rather clever traders and it will likely be near delivery time before the real conditions are known.

All in all you will receive better quality bulbs this season than last and your bulb bill will be lower.

OUR COVERS—By Miss Winifred Walker—

We continue our series by the famous English Floral Artist by showing "Anemones" and "A group of late flowering Tulips"—two of her recent works.

ASK FOR THESE FREE DISPLAY CARDS

For florists who cater to counter trade in Fall bulbs, we offer free with every order attractive lithographed display cards, showing many varieties of Hyacinths, Tulips, Daffodils, Narcissus, Crocus, Lilies, Peonies, etc., in their natural colors.

We have also window banners and streamers.

Ask for these if you want them. They will be a great help selling bulbs over the counter.

LIBERAL TERMS TO RESPONSIBLE PARTIES

(We have revised the text of our terms and ask all customers, both old and new, to read it):—

Our regular terms of sale are as follows: 5% off for cash with order, 2% off for cash within 10 days; final payment to be made within 60 days. These terms still apply in all sales to customers who in turn resell the bulbs.

To the grower and florist, however, we have inaugurated the "GROWERS' TERMS" of sale. They are as follows: invoices for bulbs are payable from responsible florists and growers 10 days after the normal flowering period of the particular bulbs sold, with final payment on late bulbs due 10 days after Easter. We, in this way, endeavor to assist the florist and grower during the period that the stocks are in growth.

WHAT WE GUARANTEE. We guarantee that all bulbs leave our farms and warehouses in good condition, packed in boxes or packages substantially secure and sufficiently strong

to insure delivery in good condition with reasonable handling. The risk of transportation is one which the customer must absorb.

WHAT WE DO NOT GUARANTEE. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out, nor will we be in any way responsible for the crop. If the customer does not accept the bulbs, roots or seeds under these conditions, they must at once be returned to us and any money paid will be promptly refunded.

Positively no claims allowed unless made within five days after the receipt of merchandise.

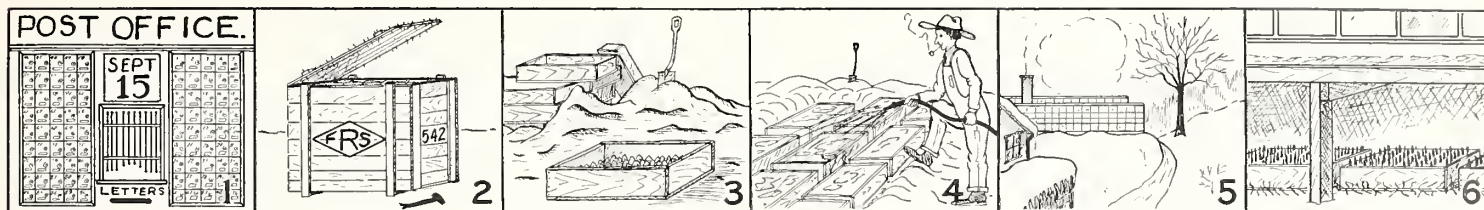

ALL PRICES CONTINGENT UPON MAINTENANCE OF PRESENT TARIFF SCHEDULE AND SUBJECT TO ANY CHANGES MADE THEREIN UP TO AND INCLUDING TIME OF DELIVERY.

Simple Instructions For Bulb Forcing

- 1—Order your bulbs early. For best forcing results good root action is essential and this can only be accomplished if the bulbs are planted on time.
- 2—Unpack the bulbs as soon as received. If they are not to be planted immediately they should be taken out of the bags and stored in shallow trays in a cool well aired location. This is more important than is generally believed for much damage can result to the bulbs by a prolonged stay in the shipping containers.
- 3—Do not use the very shallow flats. We recommend four inches minimum inside depth.
- 4—Give the flats a moderate watering only and bury them in deep trenches and cover thoroughly.
- 5—Don't be tempted to bring them into heat too soon. This is the cause of most of the failures.
- 6—Examine the bulbs carefully to see that they have established good root systems before bringing them into the heat. Also be sure that the variety you are handling is adapted for forcing at that particular time. Be careful of bottom heat for many bulbs are spoiled by immediate, close contact with hot pipes. Place under the benches until top growth develops a few inches. A gradual increase in temperature is better than placing the bulbs immediately into a high heat.

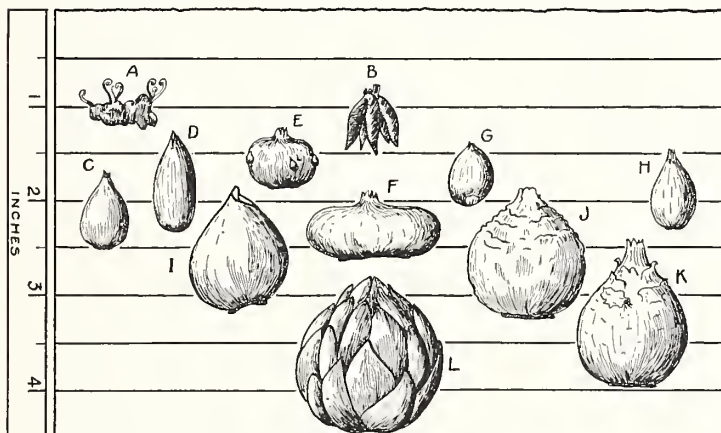

The "spotting" of Tulip Flowers, which yearly is a source of much grief to many Tulip forcers, is usually attributable to improper atmospheric conditions, and these can be corrected to a great extent by exercising care in watering. Our suggestion is that the watering be done in the morning. The buds and opening flowers should never be sprayed until there is sufficient sun heat or air circulation to permit of quick drying.

B—Ranunculus
C—Snowdrops
D—Spanish Iris

E—Crocus
F—Gladiolus
G—Scillas
H—Fritillaria Meleagris

I—Tulips
J—Hyacinths
K—Narcissus
L—Liliums

One-half Natural Size

When Planting Bulbs OUTDOORS

Outdoor planting should also be done as early as possible so that the bulbs can develop a good root growth before the cold weather sets in. The soil must be thoroughly spaded to a depth of at least twelve inches and a good application of rotted manure or bone meal incorporated at the time. Remove a layer of the soil of the same depth as the final cover, level the surface, then set the bulbs upright in the arrangement as desired and then replace the cover. A mulching of leaves, rotted manure, peat moss or similar subjects is always helpful and is necessary in colder regions.

The table below shows the number of bulbs required for the planting of circular beds of the sizes as given. For oval beds the average diameter can be obtained by adding the greatest length and width and then splitting it.

"World's Foremost Bulb Growers"

"From Florida to The Florist"

A BUMPER CROP JUST HARVESTED
Of The Finest Bulbs We Have Ever Raised

Higher Quality and Lower Prices

This is the combination that we are able to offer our customers this year for the crop never was finer and the increased quantities permit of lower quotations. We maintain that our bulbs, produced on our own farms in southern Florida, are the finest available in this country. Bear in mind that Florida is a large state and do not be misled by offers from many other parts of the state where weather conditions are totally unlike our section and where bulbs of variable quality are produced.

Narcissus—PAPER WHITE GRANDIFLORA
Showing a made-up bowl growing in water

Our lower prices will tend to reestablish these bulbs in the popular favor thus possessed before the embargo. For the smaller grower, who has his own retail outlet, these bulbs provide a dependable supply of flowers over a period when cut stock is scarce. Their greatest value, of course, is in counter sales for bowl work and with the present craze for dish gardening a good demand should be experienced to all those who feature them.

NOTE: These prices are f.o.b. Jacksonville, Fla., but we expect to have a supply available at our warehouse in New York and to shipments made from here the extra freight will be added. Please state your choice of shipping points.

In addition to the Paper White Narcissus shown here, we offer on the next page Chinese Sacred Lilies, Soleil d'Or, and other varieties of tender narcissus all of which are good for forcing or for house culture and are all easily flowered in bowls with water and pebbles or fibre.

On the inside back cover we list a line of bulb bowls and accessories and these items will aid your sales and help your customers.

Other Florida-grown NARCISSUS

In order to acquaint our customers with the beauty of some of the other Polyanthus varieties, we are reproducing herewith our artist's painting showing five of these varieties, made from the actual flowers.

Gloriosa

Chinese Sacred Lily

(Narc. Tazetta Orientalis)

The bulbs we are producing in Florida are much finer than ever came from China. They do not have that crab-like appearance of the imported stock but are more solid and flower more readily.

We have advocated their use by Florists, for we are sure that the flowers will find a ready market. They are also very popular for house culture. Note our much reduced prices.

First Size Bulbs 100 \$7.00; 1,000 \$65.00
Mammoth Bulbs 100 8.00; 1,000 75.00

Paperwhite
Grandiflora

Soleil d'Or

(Yellow Paper White)

Pure golden yellow. We have the largest block of these ever assembled at one place, and our Florida bulbs give excellent results. Can be bloomed just as easily as Paperwhites and no trouble is experienced in getting them into flower for the Xmas holidays.

Soleil d'Or

Double Roman

"Constantinople"

This is possibly the most fragrant of all Narcissus. Large, full double flowers produced in clusters. Easily forced or grown in the home.

Per 100, \$5.50; per 1,000, \$50.00.

White Pearl

Gloriosa

Cream yellow with darker yellow eye. Popular with Florists. Flowers very early and has good substance.

Per 100, \$5.50; per 1,000, \$50.00.

Grand Monarch

This is one of the sturdiest of the polyanthus Narcissus. Produces large clusters of cream-white flowers with canary yellow centers on very stocky stems. Is not early but a splendid variety for flowering from February first and later.

Per 100, \$5.50; per 1,000, \$50.00.

Grand Monarch

White Pearl

This is a pale creamy-white variety which, on account of its long keeping qualities, promises to be very valuable for dry bulb sales extending into the early spring months after Paperwhites are finished. It produces a large cluster of flowers with much substance and is very floriferous.

Per 100, \$5.00; per 1,000, \$45.00.

"World's Foremost Bulb Growers"

"Sir Watkin" is a Money-Maker; Good Forcer and Free-Bloomer

Hardy Narcissus (DAFFODILS)

UNLIKE Daffodil production in Holland, where the cultures are confined to a small area, the bulbs over here have been grown almost the length and breadth of the country. Some of the stocks were in the hands of experienced growers, while much of it was being handled by those with no prior experience. Of course, each section claims to produce the best bulbs; but claiming has been easier than demonstrating and now that American forcers have had a few seasons in which to demonstrate the value of the bulbs produced from these various sections, they are beginning to realize that there IS a difference—and a vast one. We have tried many lots in our own greenhouse—not merely a flat or two—but in sufficient quantities to make a real commercial test. Our experience with King Alfred is typical in that a lot secured from a large and prominent source remained in the greenhouse six weeks longer than our own Long Island bulbs, flowered two weeks later and only produced 75% as many flowers. Here is our conclusion—Size for size Long Island grown Daffodils will produce more flowers per bulb than those grown in any other section of the country, will give a greater flowering percentage and flower earlier.

This year the forcing of Daffodils threatens to be somewhat revolutionized by subjecting the bulbs to cold storage under a treatment worked out by The Department of Agriculture. We have been actively cooperating with these experiments and are familiar with the latest known methods of handling and are equipped to treat the bulbs in a method which will insure the earliest flowering period.

We have an extra fine stock of King Alfred, which is the peer of them all, and in considering the price of this variety, it should be borne in mind that the flowering percentage of the bulbs we offer is greater than with the bulbs formerly imported.

A shortage of the Bicolors still exists; but there are enough other varieties available to produce a succession of blooms throughout the season in a good representation of all the types.

All of these Hardy Narcissus are quoted F.O.B. Yaphank, Long Island, with the usual extra charge for containers.

Classification of Narcissus Types

A brief explanation of the leading types is shown below!

AJAX, large trumpets.

BARRI, short cup, usually not over 1/3 the length of the perianth (petals).

INCOMPARABILIS, medium length cups, sometimes 3/4 of the length of the perianth.

LEEDSII, medium length cups of white or cream with white perianth.

POETAZ, flowers in clusters.

POETICUS, pure white perianth, short cups with rim of orange or scarlet.

JONQUILS, small flowers in clusters. Very sweet scented.

NOTE—Large trumpet Daffodils are erroneously called Jonquils in some sections of the country.

General List of Hardy Narcissus (Daffodils)

	Doz.	100	1,000
Achilleous (Poetaz), white, cup orange-yellow.....	\$1.00	\$7.15	\$60.00
Albatross (Barri), large white perianth with lemon-yellow cup	1.00	7.15	60.00
Alsace (Poetaz), petals pure white with yellow eye, slightly tinged red at margin, earlier than Ornatus, very fine	1.00	7.15	60.00
Amazon (Leedsii), a flower of fine form and great substance, perianth pure white, cup canary-yellow, a strong grower and fine bloomer, often coming with two flowers.....	1.00	7.15	60.00
Aspasia (Poetaz), white with yellow eye — very vigorous grower	1.00	7.15	60.00
Autocrat (Incomparabilis), dainty, solid yellow of good form	1.10	7.80	65.00
BARRI CONSPICUUS (Barri), yellow perianth, short yellow cup with orange-scarlet edge. Very free flowering and good for cutting and naturalizing90	6.00	50.00

We Had To Be Shown—so we took our own bulbs and forced them in our own greenhouse and the photograph shows the result. This pot of King Alfred, containing 7 bulbs, had 26 flowers. Nearly 4 flowers to each bulb!

Do You Know?

—that we handle about 25% of all the Narcissus produced in this country? And that practically all are grown on our own farms?

Isn't it reasonable to believe that the intimate knowledge thus gained in the production of these bulbs puts us in a position to serve you to better advantage?

New and Rarer Varieties

While the rage for Novelty Daffodils continues unabated in Europe, some part of the enthusiasm has invaded this Country, and our stocks, both here and abroad, are capable of supplying the demand. At our Holland Nurseries we have the finest collection of Novelty Daffodils in the world, and we shall be pleased to submit lists to those interested in importing under special permit.

The following varieties are being grown at our Long Island Nurseries and are available for shipment from there.

At the International Daffodil show held in Haarlem this past spring our European House was given the highest award (Gold Medal) in competition with the leading English and Continental Daffodil specialists.

- AIDA** (Barri). Pure white perianth with beautiful orange red crown. **Each, \$5.00.**
- ALCESTE** (Inc.). White perianth with large flat yellow cup a flower of perfect form. **Doz., \$1.75; 100, \$12.00.**
- APOTHOSE** (Ajax). Large trumpet Daffodil of exquisite form, soft yellow. **Doz., \$21.75; 100, \$150.00.**
- ARGUS** (Bic.) (Ajax B.) Among the best of the new bicolors. **Doz., \$5.80; 100, \$40.00.**

GIANT FLOWERING HYBRID AMARYLLIS

The Finest and Largest Collections in the World

A few years ago when we started the extensive culture of these bulbs visitors to our fields inquired as to the possible market for such quantities of a bulb which formerly had been sold in limited numbers only. We replied that any bulbs that performed such as these Amaryllis did would quickly be in demand and our predictions were borne out this past season when we had to refuse many late orders.

This year they are finer than ever before.

A re-selected strain of the very largest flowered sorts, ranging in color from almost pure white, through various shades of pink, to the deepest scarlet, some with beautiful markings and mottled throats.

An easily-grown plant of wondrous beauty; a quick seller to those who love an unusual and attractive pot plant for the living room or sun parlor. Makes a charming and lasting cut flower.

BELLADONNA

One of the best of "cool house" flowering bulbs. Large trumpet-shaped flowers of a pale china pink. We can make immediate delivery of these bulbs, as they require to be potted early for best results.

Doz., \$2.50; 100, \$17.50; 1,000, \$150.00.

EQUESTRE

A free flowering flame red variety that is much admired by all. Makes a fine pot plant and is very valuable for outside planting in the South, where it propagates freely.

Doz., \$1.50; 100, \$10.00; 1,000, \$85.00.

VALLOTA PURPUREA

(Scarboro Lily)

A most valuable Autumn-flowering cool greenhouse plant, producing on stout stems umbels of 5 or more large brilliant scarlet flowers which open in succession, thus remaining decorative a long time. It may be planted out of doors in May, and when in bud potted up for greenhouse or sitting-room decoration. Doz., \$10.00; 100, \$60.00.

SPREKELIA-JACOBAN LILY

Brilliant crimson flowers, closely allied to the true Amaryllis; remarkable for its brilliancy and peculiar form, the upper petals ascending, while the lower ones enclose the stamens.

Doz., \$3.00; 100, \$20.00.

AMARYLLIS JOHNSONI

The old favorite free flowering variety. Crimson with white stripe. Naturalizes readily in the South.

Doz., \$3.00; 100, \$20.00; 1,000, \$175.00.

A FEW years ago when Darwins became so reasonable in price many large users of the Early types eliminated them in favor of the Darwins but they soon ascertained that the Earlies had values which could not altogether be found in the other types and now that the prices are more equalized we expect a revival of interest in this group.

These bulbs have their greatest value when forced early, for it is obvious that they cannot compete favorably when the larger later types come into flower. Some of the varieties are readily bloomed for Xmas and others maintain an unbroken succession through the early Spring months.

Their popularity for outdoor formal bedding is well known, and they continue to be used extensively for this purpose in parks and gardens all over the country. Particular care should be taken in selecting the varieties best adapted to the purpose intended, for many have a beauty or value only when grown under certain conditions.

Double Early Tulips

DOUBLE TULIPS are mainly used for pots and pans, and some of the kinds, notably Couronne d'Or and Murillo, are grown in large quantities for cut flowers. While used outdoors to some extent they are not as popular for this purpose as the singles. Good stocks of several fine sports of "Murillo" have been developed the past few years and they promise to become more popular than the parent.

	Doz.	100	1,000
*Boule de Neige , creamy-white, peony-like flower. Very large and ideal for pots and pans. Fine for outside.	\$.60	\$4.10	\$34.00

Superb Darwin Tulips

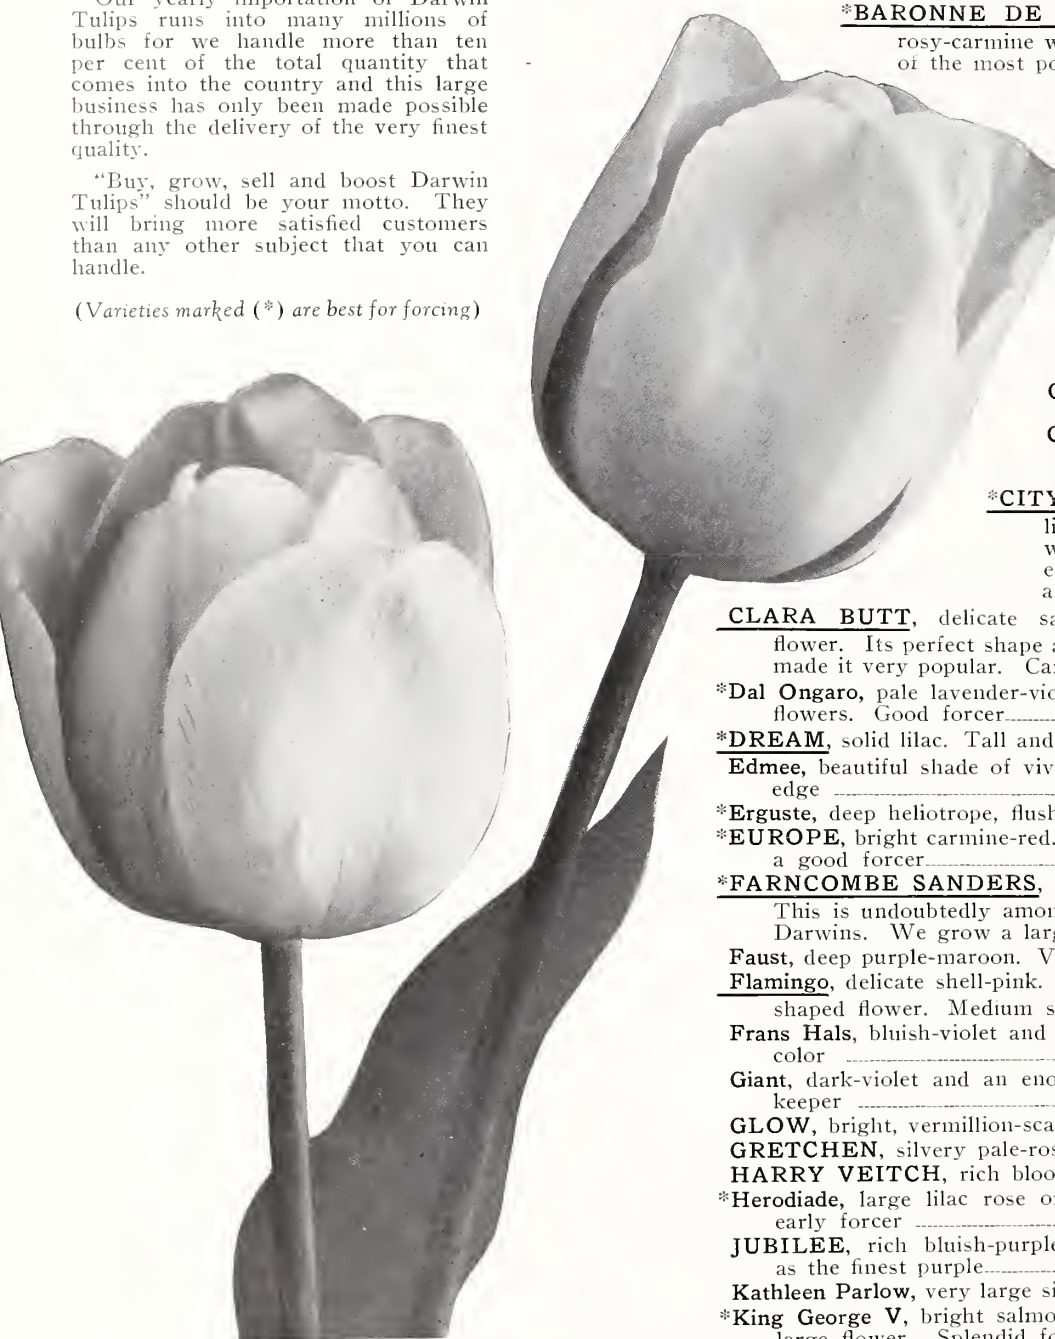

OUR LEADING SPECIALTY

In specializing on such items as offer the greatest profit possibilities and satisfaction to our customers, we naturally turn to Darwin Tulips for we believe that these bulbs represent the greatest dollar's worth of flower making material that is available in the bulb line. The fact that we handle more Tulips than any firm in this country is in itself a selling argument for we could not build up or maintain this large volume if we were not giving the trade something a little better than our competitors.

Our yearly importation of Darwin Tulips runs into many millions of bulbs for we handle more than ten per cent of the total quantity that comes into the country and this large business has only been made possible through the delivery of the very finest quality.

"Buy, grow, sell and boost Darwin Tulips" should be your motto. They will bring more satisfied customers than any other subject that you can handle.

WILLIAM COPELAND

This is the light lav-
ender variety so gen-
erally used for early
forcing. It is the earliest
variety of all and this
quality, combined with
its ease of culture,
makes it one of the most
valuable kinds. It is also
good for outside planting
where it develops a
beautiful pink tinge to
combine with the lav-
ender. Large Bulbs for
forcing.

WILLIAM PITT

This is the finest of the early red varieties and as such is used most extensively for early forcing. Last year we featured this variety for the first time at a reasonable price and at the lower figure we disposed of large quantities. This year the price is somewhat higher but we recommend it not only as the outstanding early red but as an excellent variety to use throughout the season.

The New Mendel Tulips

A fine early flowering class, developed from Darwins, crossed with the Early Duc Van Thol Tulips. They might be termed "Darwin Dwarfs" averaging about 20 inches high, with the appearance of Darwins and the early flowering qualities of the Van Thol. They bloom three weeks before Darwins and this advantage is a big one. Just as soon as available quantities warrant reasonable prices they will be used extensively and in the meantime you may want to try out a few.

Exquisite Breeder Tulips

Breeder Tulips are recognized as the aristocrats of the Tulip family. Their odd artistic colors and shadings are not found in the other Tulip groups.

They bloom at about the same time as the Darwins and they resemble this class in growth and shape of flowers.

The use of Breeder Tulips has steadily increased, and this year, with the much lower prices that prevail on many of the most beautiful kinds, we expect an unusual demand and have prepared our stocks accordingly.

Botanical or Species Tulips

CLUSIANA, violet pink with white margin. Inner petals pure white. Small, graceful, pointed flower.

Each year at the New York Flower Show this dainty little tulip is seen in greater profusion and makes many new friends. It seems to force without trouble and as an edging for outdoor plantings of the larger types of tulips it is unsurpassed. To know it is to like it.

It is grown in France so does well outdoors in our extreme southern states where other types will not prosper.

Per doz., 60c; per 100, \$4.20; per 1,000, \$35.00

PARROT TULIPS

While the newest, largest or most brilliant of our newer Tulips make an appeal to most Tulip lovers there are others who seek the unusual and the dainty and so a recent renewed demand is developing for the Botanical or original Species and retail houses are listing them and advocating their use for rock gardens and other locations.

We list below most of the favorites.

TULIPA CLUSIANA

"World's Foremost Bulb Growers"

Dutch Hyacinths

This year sees a resumption of near normal conditions in Hyacinth production, and by this we mean not only are the bulbs of better quality than they have been for the past few years but prices have been materially reduced. We believe that at these levels the old popularity of these bulbs will be regained and they will once more be regarded as among our most prized Spring flowers.

We are large producers of these bulbs on our own grounds in Holland.

Hyacinths vary in price according to the size of the bulbs and, of course, the larger bulbs produce bigger and finer spikes, with more individual florets. There is no difference in the flowering time of the sizes.

HYACINTHS
(after three days under glass)

WHITE AND BLUSH

- Albertine**, early pure white.
Arentine Arendsen, snow white, early forcer, large bells.
Grandeur a Merveille, rosy white.
Hein Roozen, early pure white, tall and graceful.
L'Innocence, pure white, excellent forcer, most popular.
La Grandesse, pure white, for early forcing.
Mme. van der Hoop, white, slightly flushed blush.
Queen of the Whites, new extra fine pure white forcer.

BLUE AND PURPLE

- Bismarck**, extra large and early, deep porcelain blue.
Doctor Lieber, dark porcelain blue. Extra.
Enchantress, delicate blue, large spike.
Grand Lilas, large porcelain lilac.
Grand Maitre, best deep porcelain blue, large truss.
Johan, silvery light blue.
King of the Blues, best dark blue, late.
Lord Balfour, purplish violet, large truss.
Perle Brilliant, light blue.
Queen of the Blues, clear light blue, one of the best.
Schotel, pale porcelain blue, very large.

See Next Page for
Prices of the Various Sizes

When forcing Hyacinths, or most other bulbous stocks, it is of great importance to see that the bulbs are well rooted and show evidence of top growth before bringing into heat. The photograph above shows a well established pot and we suggest growth at this stage before forcing.

PINK, ROSE AND RED

- Gertrude**, rosy pink, florists' favorite.
Gigantea, soft rose, large truss.
King of the Belgians (Roi des Belges), glossy deep red.
Lady Derby, charming delicate rose, very early.
La Victoire, brilliant rosy crimson. Extra.
Marconi, bright red, shaded white, extra for forcing.
Moreno, splendid pink, large full spike.
Queen of the Pinks, splendid rose pink, very large, extra.
Robert Steiger, scarlet.
Victor Emmanuel, large crimson rose, very early.

YELLOW

- City of Haarlem**, golden yellow.
King of the Yellows, late deep yellow.
Yellow Hammer, early golden yellow.
 Varieties underscored are leading kinds.

French Roman Hyacinths are Again Available in the Larger Sizes

Our Prices on Hyacinths of All Sizes

EXHIBITION SIZE—MEASURING 19 CTM. AND OVER

This is the top size and the pick of the crop. Where extra large spikes are desired this is the size to use. We can supply this size in any of the varieties shown on the opposite page.

Per doz., \$1.55; per 100, \$10.80; per 1000, \$90.00

FIRST SIZE BULBS—MEASURING 18-19 CTM.

We can also offer this size in any of the varieties. They produce large trusses and are used extensively in single pots or pans where large flowers are desired.

Per doz., \$1.35; per 100, \$9.35; per 1000, \$78.00

SECOND SIZE BULBS—MEASURING 17-18 CTM.

This size produces slightly smaller spikes than the two larger sizes. They still make a very fine showing and are one of the most popular for Florist use and for bedding. This size can be supplied in any of the varieties we name.

Per doz., \$1.10; per 100, \$7.80; per 1000, \$65.00

FORCING SIZE—MEASURING 16-17 CTM.

This size is used extensively when a good showing is desired with bulbs of a smaller cost. The bulbs are available in any of the popular kinds only.

Per doz., \$1.00; per 100, \$6.85; per 1000, \$57.00

BEDDING SIZE—MEASURING 15-16 CTM.

This is the most popular size for outdoor planting. It rarely makes a spike of sufficient size for single pots but can well be used in pans. We have liberal quantities in all the most popular kinds in each color.

Per doz., \$0.75; per 100, \$5.10; per 1000, \$42.50

MINIATURE SIZE—MEASURING 12-15 CTM.

These bulbs are used exclusively for forcing and are not recommended for outside planting. We have selected the following named kinds which make the best showing in this size. La Grandesse, L'Innocence, Gertrude, Gigantea. Roi des Belges, Lady Derby, La Victoire, Grand Maitre, Queen of the Blues, King of the Blues, Yellow Hammer.

Per doz., \$0.60; per 100, \$4.20; per 1000, \$35.00

Hyacinths Should Be Profitable This Year

Hyacinths are plentiful this year and lower in price than they have been for several seasons. This should be an inducement to growers to increase their quantities on the forcing sizes.

FRENCH ROMAN HYACINTHS

Now that the supply is increasing these bulbs are again assuming their old popularity. There is no bulbous item that can be forced for Xmas and mid-winter use that is as graceful as the Roman Hyacinth. They make splendid pans and are very useful for basket and make-up work. They can also be easily and successfully grown in the home in bowls of fibre.

GIANT CROCUS

COLCHICUM AUTUMNALE MAJOR. We know that the trade will welcome our offer of these bulbs, the first since the embargo. We have only a limited supply this year, but the quantity will be larger very shortly. These unique bulbs bloom in early Fall and the foliage follows in the Spring. They flower readily in the home without planting. The color is rosy lavender. Ready in August.

Per doz., \$3.00; per 100, \$20.00; per 1,000, \$175.00

CROCUS ZONATUS

with grass seed

CROCUS ZONATUS. This is an early-flowering, forcing species of delicate refinement and surpassing beauty. Its earliness and easy growth have much to do with its popularity. Thrives and blooms profusely in a few weeks after starting in pans, bowls or saucers of fiber. An ornament of rare beauty and really a novelty for quick sales when displayed on counter or window. Flowers are pale rosy lilac with orange center. Bulbs ready in August.

Price per 100, \$2.90; per 1,000, \$24.00.

CROCUS SPECIOSUS. This species is similar in character to the C. Zonatus, the flowers being an attractive shade of rich deep blue, with orange anthers. Bulbs ready in August.

Price per 100, \$2.50; per 1,000, \$21.00.

CROCUS (Choice Bulbs)

Crocus bulbs have felt severely the damage due to the very cold weather in Holland this past year and the supply of these bulbs is extremely short and even at the higher prices, we doubt very much if there will be anything like enough bulbs to go around. Don't Fail To Try Our New Large White Freesia "Superflora"

Our Own Permanent Resident Buyer in California!

Realizing the importance of the Pacific Coast regions in bulb production we have established an agency there and our own buyer, operating from our office at 925 Howard Street, San Francisco, has been busily engaged during the flowering period inspecting the fields and making contract purchases. He will be on the job during delivery time—carefully checking and inspecting each lot—and in this way we will eliminate the peculiar differences that have existed in the stocks produced out there and delivered in the past.

We will thus be assured of a consistent supply of the best bulbs that are produced in the section and in addition will have quick and reliable information on the state of the different crops and markets.

By allowing us to serve you on your Californian bulb requirements you share in these big advantages.

THE FINEST *in* FREESIAS

Unless the crops look good in the fields the bulbs will not perform satisfactorily when forced. Our stocks are field inspected.

New Pure White Giant Freesia "Superflora"

Last season we sent out trial lots of this new Freesia to several of our customers and without exception they reported that it was the finest white Freesia available in commercial quantities. When exhibited in the New York Florist Club, we were awarded an honorable mention.

It is pure white about twice as large as Purity, long wiry stems and it seems to be much easier handled than most varieties. We have not sought to attach fancy prices; but prefer to put it out at figures, which will enable the grower to treat it as a commercial proposition. We control the supply.

TRITONIA CROCATA

This is an old and perhaps somewhat neglected bulb that has recently received much attention as one of the most strikingly brilliant and interesting of Winter and Spring forcing bulbs. It has the character of the Freesia but the flower spike is more like a Montbretia, the stems being thin, long, wiry and upright. The flowers are bright orange scarlet and make a most attractive pot or pan plant, while the stiff stem and flower spike make it a valuable cut flower also. Requires the same treatment under glass as Freesias.

We have been growing quite a quantity of these for the past few years, and have a fine stock to offer of large, plump, forcing bulbs.

Price per 100, \$4.00; per 1,000, \$35.00.

ANEMONES—St. Brigid and De Caen

Anemones are among our prize bulbous flowers and those who have been successful in forcing them have been amply repaid. The flowers are invariably sold quickly at good prices. They provide color effects that are unsurpassable with other subjects. The bulbs bloom over a long period and with successive plantings a good cut can be maintained over the whole season.

Our Anemones have been giving splendid results for many years and we have an extra fine lot to offer for this year.

CULTURAL DIRECTIONS

Anemones and Ranunculus like cool moisture and leafy loam, and above all, good drainage to prevent stagnation which rots the bulbs. The best potting or benching mixture is made with equal parts of rich well-manured loam, leaf mold, and clean fresh sand. Deep pans are better than pots, but whether grown this way or in benches avoid all chance of sour accumulation of moisture by providing good drainage. The first bulbs should be put in in October and later batches for late Spring bloom. Give a cool shady position at first until roots are formed, then place near the glass with never more than 55 to 60 degrees temperature.

RANUNCULUS

We have started many greenhouse men in the growing of Ranunculus and they are making money on them. The Domestic bulbs are larger than those formerly imported and seem to force better. If your trade can use "something different" we suggest that you try them.

The giant French Ranunculus resemble in form a miniature pompon Dahlia but are as brilliant and varied in coloring as the Poppies and Anemones. In forcing them, give the same treatment as Anemones, but they do not mature quite as early.

GIANT FRENCH MIXED. The Californian grown bulbs are giving splendid results, and we have several letters from customers telling us of the fine flowers produced. Beautiful rosette flowers in a wide range of colors. Force well. The bulbs are cheaper this year.

They may be forced gently in a carnation temperature.

They are a decided novelty.

MUSCARIA

LYCORIS SQUAMAGERI

(Amaryllis Halli)

It has been difficult to amass sufficient stock of this beautiful subject to permit of a general offer; but we now have a fair supply. Produces a graceful lavender spike in midsummer without foliage and the latter is developed in the early Spring. It is hardy. Each, \$1.00; per doz., \$10.00.

UMBELLATUM (Star of Bethlehem). This is the small white hardy variety that is seen in great profusion around many of the old gardens. It propagates readily and adapts itself splendidly to naturalizing. It does well over a wide temperature range and blooms profusely each season with little or no care.

THYRSOIDES. This is the famous Chinchinchee the "Wonder Flower" from South Africa. Flowers of this bulb, arriving from South Africa after a six weeks trip, have attracted considerable attention at the eastern markets due to its extreme longevity. We believe that we are making the first public offering of these bulbs in this country. The flowers are pyramidal in shape with the buds of straw color changing to pure white. It is not hardy in the north; but should make an excellent forcing subject in the early spring and is very fine for outdoor planting in the south.

OXALIS

These are becoming very much in demand for winter forcing. Successive crops may be had from November till late spring by planting at intervals from August onwards. They are most effective planted in pans, 1½ to 2 in. intervals between bulbs, and make delightful subjects for rooms, sun parlors, etc., simply covering themselves with bloom. Florists will find these good sellers, either dormant or as blooming plants.

STERNBERGIA LUTEA

This is a Fall flowering subject very similar to Colchicum in that it will flower without being planted. It resembles a large yellow Crocus. Fine for garden use and hardy.

Per 100, \$8.00; per 1,000, \$70.00

TRITOMA RUFA

This dainty little Tritoma can be forced readily and makes a useful pot plant or a delicate and rare cut flower. We offer strong clumps suitable for immediate forcing.

Per doz., \$3.65; per 100, \$25.00

ZEPHYRANTHES

This long neglected subject is now becoming recognized and is receiving some of the attention that its beauty and usefulness merits. As a house bulb for quick and sure flowering it has no equal and for the garden, there is scarcely a spot that will not be enhanced by its presence. It can also be easily forced.

CANDIDA

This is the fall flowering white variety which is very attractive for the late summer garden. It is specially adapted for growing in bowls with fibre, and with very little attention is readily flowered in a short time, making it an excellent store item.

Per 100, \$3.00; per 1,000, \$25.00

"World's Foremost Bulb Growers"

We Are Among the Largest Importers of Easter Lily Bulbs

Florist's Forcing EASTER LILIES

Successful Easter Lily growing depends to a great extent upon the selection of the variety best adapted to the conditions under which they are to be grown. We suggest Floridi or Harrisii for those who cannot devote an entire house to Easter Lilies and Erabu for those desirous of filling in a gap in the early Spring months prior to the flowering season of the new crop Giganteum.

For those who want a succession of flowers over a long period, Giganteum is the only variety to use.

AMERICAN GROWN EASTER LILY

"Lilium Floridi"

Last year when we made the initial offer of these bulbs to the trade, we ventured the opinion that this domestic grown Easter Lily was a most valuable introduction to the bulb line. At that time the forcing tests were confined to experimental lots; but now we have reports from many of the growers who have tried them in a commercial way and these confirm our earlier belief as to its value. These bulbs are produced by us in Florida from naturalized, uniform, acclimated, garden plantings, which make them free from the variations peculiar to many imported varieties and they are also free from disease and forcers will appreciate this quality. The foliage is heavy and clean and is maintained right to the ground line thus making this variety a splendid pot plant. The keeping qualities of the flowers surpass any other commercial varieties.

We recommend that they be forced in a temperature of from 50 to 55° which can be raised slightly after the buds develop.

The supply is as yet limited and it is our desire to have as great a distribution as possible. We are limiting the supply to a case or two to each customer.

Mammoth size, 100 bulbs to case, all double crown, each bulb of the double crown measuring 6" in circumference.

First size, 150 bulbs to case, all double crown, each bulb of the double crown measuring 5" in circumference.

Second size, 200 bulbs to case, all single crown measuring 5/7" in circumference.

All at \$25.00 per case F.O.B. growing station, Bradenton, Florida.
(No split cases sold)

LILIUM GIGANTEUM

There is a vast difference between Giganteum bulbs as produced in the various sections of Japan and we have for years been making a careful observation of the different stocks. For the past few years the bulbs we have delivered have produced far better than any other stocks that we have seen or that have been reported to us. This year we will have our supply from the same dependable producer.

There is every indication that the larger sizes are scarce and we are booking them only subject to actual delivery to us.

A HOUSE OF GIGANTEUM

"Landsdowne, Pa.

Dear Sirs:

We received three cases of lilies from you in December and were not planted till February 15, and were all in for May 30. I want to state that these were the finest lilies I have ever seen, every bulb producing a long stem with 4 to 6 blooms on each one.

I am giving your salesman an order for 25 more cases.

Yours truly,

LILIUM REGALE

Hardy Lilies—Continued

LILIUM REGALE (Myriophyllum)

The beauty of this fine Lily is well known and it stands unequalled among those which will thrive in this country. The trade has long awaited a supply of these bulbs at reasonable prices, and we are now glad to have a stock sufficiently large to enable us to make a general offer.

In this latitude the **Regale Lilies** bloom in early June and about the same time as **Lilium Candidum**. They have white trumpet flowers with slight pink and other colored stripes on the lower petals and are very fragrant. The bulbs we offer are good flowering size and we suggest that they be left undisturbed for several years as they will then enlarge annually and throw more and larger flower spikes.

DIELYTRA SPECTABILIS

DIELYTRA SPECTABILIS

(BLEEDING HEART)

We have been advocating the more extensive use of this beautiful decorative plant for several years and those of our customers who have availed themselves of our suggestion have profited. It is used extensively as an early spring pot plant and is a fine specialty for St. Valentine's day. The cut sprays are also useful. It is perfectly hardy and makes a splendid showing in the perennial border or when planted with early bulb stocks.

We are the largest growers of this very useful plant and offer large clumps suitable for forcing or outside planting.

Our clumps, all produced from cuttings, are far more productive than from divided stock.

MRS. FRANK PENDLETON

10,000,000 Gladiolus

At Lower Prices Than Ever Before

Our commanding position among Gladiolus suppliers has been brought about mainly by developing stocks of newer varieties after their value in a commercial way has been demonstrated. On top of this we have been aware of the definite limit which regulates the prices that growers can profitably afford to pay. We were the first to offer such outstanding varieties as Los Angeles, Virginia, Souvenir, etc. at these reasonable levels and this year have added other equally fine varieties to the commercial list.

Gladiolus are more popular today than ever before. Flower buyers have come to regard them as indispensable as Lilies and they are now available every day in the year. At our moderate prices, you can afford to grow the best for even in the duller markets these select varieties command a premium that insure a profit.

We are now booking orders for Summer, Fall and Spring deliveries and at these quotations you can afford to order liberally.

Commercial leaders for 1930-1 Season

MRS. LEON DOUGLAS. Very robust and strong grower with wide leaves and tall heavy spikes and flowers. The color is light rose with flakes and specks of red and scarlet with light yellow tints on lower petals. Becoming very popular. Note our special price.

1½" and up, 100, \$3.00; 1,000, \$27.50.

MRS. FRANK PENDLETON. In spite of the many fine varieties being added every year this Gladiolus still maintains its position as head of the commercial group. The color is rosy pink with lavender shadings and a pronounced dark carmine blotch. Its form and substance leaves nothing to be desired.

1½" and up, 100, \$2.10; 1,000, \$18.00.

VIRGINIA. Without doubt the finest red forcing gladiolus on the market today. Its earliness and lasting brilliancy have created for it a phenomenal popularity. It is a pure scarlet with a slightly lighter throat, with large open flowers facing one way. Whether for outside or for forcing there is nothing of its color equal to it.

1½" and up, 100, \$2.10; 1,000, \$18.00.

LOS ANGELES. Commonly referred to as "the branching Gladiolus" due to the fact that it produces several lateral stems all of which make good flowering spikes. Color shrimp pink, orange carmine throat. We consider this as an outstanding commercial pink. Note our very special price.

1½" and up, 100, \$3.00; 1,000, \$25.00.

SOUVENIR. (Primulinus.) Pure golden yellow grandiflora type of primulinus. Well spaced flowers on strong stems and very early. Splendid forcer and good outdoor grower. We have the largest stock of this fine, real yellow variety and it is the only true yellow available in commercial quantities today.

1½" and up, 100, \$2.65; 1,000, \$22.00.

ORANGE QUEEN. (Primulinus.) Apricot-orange and a color that does not exist in any other variety. A fine grower and now that the price is cheaper it will soon rank among the very popular kinds. It is among the best forcers.

1½" and up, 100, \$4.50; 1,000, \$40.00.

Condensed List of Popular Varieties

ALICE TIPLADY. (Primulinus.) Beautiful saffron color and one of the best known and finest of the Primulinus types. Its attractive color is not approached in any other variety. Splendid for forcing or outside planting.

1½" and up, 100, \$2.10; 1,000, \$18.00.

BLERIOT. This variety combines the color combinations of splendid qualities of Halley and Pendleton for it has a salmon pink outline with a beautiful large blotch and splendid form and substance. It promises to be a splendid commercial kind.

1½" and up, 100, \$3.00; 1,000, \$25.00.

CRIMSON GLOW. This variety is considered the finest deep crimson. It is a tall, strong, grower with flowers well placed.

1½" and up, 100, \$2.50; 1,000, \$22.50.

E. J. SHAYLOR. Pure ruffled deep pink. Large flowers and tall stems. A fine commercial pink.

1½" and up, 100, \$2.10; 1,000, \$18.00.

ELIZABETH TABOR. The extreme earliness of this variety gives it much promise. Delicate rosy pink with dark crimson blotch on lower petal. Tall spike and good formation.

1½" and up, 100, \$3.50; 1,000, \$30.00.

ELORA. Creamy white. Small carmine blotch with background of

yellow. Very early. Large, full flared flowers.

1½" and up, 100, \$3.00; 1,000, \$25.00.

EVELYN KIRTLAND. Rosy pink with darker margin and brilliant scarlet blotch on lower petals. A very fine variety.

1½" and up, 100, \$2.50; 1,000, \$22.50.

FLAMING SWORD. The outstanding new European red. Flowers in single row formation with six and more open together. Color is soft red. This variety has great commercial promise on account of its extreme earliness.

1½" and up, 100, \$3.00; 1,000, \$25.00.

GIANT NYMPH. Without a doubt one of the largest and finest varieties—one that has lived up to all the great things said about it when first introduced. Color is "La France" pink with a creamy yellow throat; large wide open flowers well placed; 6 to 7 open at a time on a huge spike.

1½" and up, 100, \$3.50; 1,000, \$30.00.

GOLDEN MEASURE. Extra fine large yellow. This is no doubt the finest commercial yellow.

1½" and up, 100, \$4.50; 1,000, \$40.00.

GRETCHEN ZANG. La France pink with lower petals blotched deep rose and scarlet. A strong grower and favorite cut flower variety.

1½" and up, 100, \$2.75; 1,000, \$25.00.

These Wrapped Ferns are the Most Popular Store Seller in the Horticultural Line

Rynveld's Florida-grown WRAPPED FERNS

WRAPPED BOSTON FERN

BOSTON

This is the most popular variety. It establishes itself quickly and makes a fine house plant. We have a large stock of compact, well-grown plants.

ASPARAGUS PLUMOSUS

This ranks as the second best seller. In the early stage of growth it makes a compact plant and later the fronds lengthen and trail.

ASPARAGUS SPRENGERI

This is a sturdy variety that is largely used in late spring for hanging baskets. Its trailing nature makes it specially useful for this purpose.

WHITMANI (Lace Fern)

The beautiful and graceful lace fern.

Compacta (Sword Fern)

Straight, sword-like fronds. This variety is tough and will stand lots of abuse.

ENGLISH IVY (Wrapped plants)

Long, well rooted strands. English Ivy is very popular these days as a house plant.

Price, \$6.00 per 100. (No smaller quantity sold)

These prices are f.o.b. our shipping station Rynveld's Fernery, Zellwood, Fla.

Write for prices on large quantities.

NOTE!

Clear and complete instructions are printed on each wrapper. It enables your customer to take proper care of the plant and tends for greater satisfaction and increased sales.

While not particularly adapted for reestablishing by florists, these wrapped ferns are a great counter attraction and sell quickly at their market prices. We are the largest individual producers and shippers, and annually distribute several millions over a widely scattered area, including the Pacific North-west.

Every fern that we offer has been transplanted at least once and this means a more compact set of fibrous roots, which in turn enables the ultimate buyer to readily establish it when potted up and placed in the home.

The roots of each fern are covered with damp Sphagnum moss and wrapped with heavy wax paper which retains the moisture and assures arrival in good condition, and further maintains the fresh appearance when displayed on the counters.

We ship in light, solid, corrugated paper-box containers, which considerably lessens the weight and reduces the transportation costs.

Approximate packed weights per 100 ferns: Bostons—28 lbs. Plumosus—22 lbs. Sprengeri—35 lbs.

These three varieties offered at the same price, per 100, \$5.50 (no smaller quantity sold)

These two varieties per 100, \$7.50 (no smaller quantity sold)

Sansevieria, The Modernistic House Plant

The demand for this popular house plant is ever increasing and we are constantly adding to our acreage with the hope of being able to take care of a greater number of customers.

For shipment this Fall, we will have a limited supply of Laurenti and a much larger quantity of Zeylanica especially in the smaller sizes. With the present craze for dish gardens, the small Zeylanicas are a very useful subject for they will survive where most other plants will perish.

We are in a position to accept standing orders for shipments at given intervals and will appreciate your inquiries for the size plants best adapted to your requirements.

Special rosette type for dish gardens—dwarf plants with 3 or 4 leaves, per 100 \$12.50.

SANSEVIERIA
LAURENTI

LAURENTI

The leaf colorings are the same as Zeylanica. Band of cream yellow circles the outside of the leaves.

Size "D"—5 leaves minimum height 18", per 100 125.00

Minimum shipping quantity 50 plants of any one size.

SANSEVIERIA ZEYLANICA, Showing 4 Sizes

ZEYLANICA

Light green with cross bands and spots of dark green.
Size "A"—1½ leaves with large leaf minimum height 8", per 100 \$12.50.

Size "B"—2 leaves with minimum height 10", per 100 \$16.00.

Size "C"—3 leaves minimum height 12", per 100 \$20.00.

Size "D"—4 leaves minimum height 16", per 100 \$25.00.

The minimum shipping quantity is 100 plants each of either sizes "A" or "B" or 50 plants each of "C" or "D".

OTHER PLANTS SUITABLE FOR DISH GARDENS

AGAVES

This is the well known Century Plant and a very fine subject for dish gardens. The plants have several leaves and range from three to six inches in height and will be glad to make a selection of the size you require.

Rooted plants wrapped in moss and wax paper, per 100, \$8.00; per 1,000, \$75.00.

ASPIDISTRA

We have a nice stock of this popular house plant which we can ship bare rooted to make up the size plant desired. These are wrapped in moss and wax paper.

VARIEGATED ORTHOPOGUM

This is a graceful subject with striped leaves like Pandanus. Holds up very well. Nice rooted divisions. About 8" tall with 12 to 15 leaves, per 100, \$17.50.

FICUS ELASTICA (Rubber Plants)

We will have a supply of these available through the Fall and early Winter. Well rooted top cuttings with 5 to 8 leaves and about 14" high, per 100, \$17.50.

POTHOS VINE

This tropical climber is also a useful subject for dish gardens. The leaves are green with stripes and mottlings of yellow. Holds up well and is very decorative.

Plants average 5" high with four leaves, per 100, \$20.00.

PLANTS FOR AQUARIUMS

WATER HYACINTHS—Each plant mossed and wrapped separately. Each plant 5" tall with four to five leaves. Per 100, \$6.00; per 1,000, \$50.00.

WATER LETTUCE—This is an easily grown decorative subject for aquariums. Each plant mossed and wrapped separately. Per 100, \$6.00; per 1,000, \$50.00.

PEONIES

We are growing a nice block of Peonies on our Long Island farm and the plants look particularly well this season. No flowers are cut from this stock and thus the full strength of the plants is reflected in the roots we send out.

We list below the most important kinds of which we have good quantities but we are also growing many other kinds that will be quoted upon application.

Shipments—All varieties are offered in 3 to 5 eye divisions for September and later delivery.
